- Brush/cap applicator places activator only where it is needed.
- Dropper tip places adhesive only where it is needed.
- Installer gets twice the number of installs than from competitive products.
- No spray cans to clog and wastes product
- No overspray to clean up.
- Long shelf life -- at least 15 months.
- Each kit packed in handy "clam shell" designed to keep kit clean and organized.

Part No. ST-05  
[Made in the U.S.A.](#)

### **Easy to use:**

#### **Step One:**

Thoroughly clean glass and mirror button. Be sure no residue remains on either item.

#### **Step Two:**

Using the supplied brush-cap, carefully apply a thin film of Part 'A' Activator to the area of the glass where the mirror button will be affixed.

#### **Step Three:**

Using the integrated dropper tip, apply a thin film of Part 'B' Adhesive to the mirror button.

#### **Step Four:**

Apply steady pressure to the mirror button for a period of 1-2 minutes, assuring the 2 pieces are adequately bonded prior to installing the mirror on the freshly mounted button.
